Rodent Control

Anping Web Wire Mesh Co.,Ltd.

Woven Wire Mesh For Rodent Control

Introduction

Rodents do a lot of damage in our daily life. They destroy furniture, books, food, clothes and even appliances. What's worse, rodents have been linked to a number of human diseases. As they are small, it makes them hard to control.

The copper knitted wire mesh is designed to stuff a variety of openings to stop rodents and other similar unwanted animals.

The main reason for this is metal property and knitted construction. Pure copper will not rust, contaminate or scratch surfaces. Also copper is a very soft metal, so it is easy to cut and form. The mesh has lay flat wires, which gives a very tight and grippy final structure. Because of the special interlocked structure, once stuffed into a space this copper mesh is very difficult to remove or get through. So it is very hard for rodents to chew through.

Idea for	Screen Size	Features & Benefits
<ul style="list-style-type: none">• Kitchen• Garden	<ul style="list-style-type: none">• 100mm width• 125mm width• 150mm width	<ul style="list-style-type: none">• Easy to Install, 99.9% Copper - The Highest Purity Possible• Environmentally Friendly, Never rust and will not leave rust stains on brick or wood• Exclude Rats, Mice, Birds and Insects,• Easy to cut with scissors• Construction Grade Quality

Technical Parameters

When ordering, please specify:

1. Weave Type

Standard knitted weave type

2. Wire Diameter (D)

3. Hole Size (W1 x W2)

4. Roll Width (RW)

5. Roll Length (RL)

Standard Weave

Knitted Wire Screen
