Cleaning Machine Parts

Anping Web Wire Mesh Co.,Ltd.

Woven Wire Mesh For Cleaning Machine Parts

Introduction

The copper knitted wire mesh is a proven and economical way to clean hot metal machine parts, such as injection machines, extruder screws and barrels, moulds and dies and similar machinery without scratching.

Copper knitted mesh will not rust or scratch and can be also used when the machine is still hot.

It has two grades: use outer surface for general cleaning and turn inside-out for heaving cleaning. The effective knitted structure keeps flat wire on edge for excellent scraping action without scratching.

Products:

- Brass knitted wire mesh
- Copper knitted wire mesh

Idea for	Screen Size	Features & Benefits
- Injection machines - Extruder screws and barrel - Moulds and dies and similar machinery without scratching	100mm width 125mm width 150mm width	- Soft, nonmagnetic and rust-free - Not contaminate or scratch surfaces - Not burn or smoke when used with hot equipment - Flexible working lengths without unraveling

Technical Parameters

When ordering, please specify:

1. Weave Type

Standard knitted weave type

2. Wire Diameter (D)

3. Hole Size (W1 x W2)

4. Roll Width (RW)

5. Roll Length (RL)

Standard Weave

Knitted Wire Screen

Wire		Opening	Width	Length	Number of Wire
mm	inch	mm	mm	m	Nos.
