Shale Shaker Screen

Woven Wire Mesh For Shale Shaker Screen

critical. We have a wide range of wire mesh, from 20mesh to 325mesh for selection.

The stainless steel wire mesh quality greatly impacts the efficiency of a shaker screens. When we produce the wire mesh, we use the most effective production techniques, ensuring that the shale shaker screens have a long service life.

Introduction

Shale shaker screen is a part of drilling equipments in the process of oil and gas drilling. The screens are considered to be the first step of solids control system, used to purify the liquids by removing large solids.

Shale shaker screen is formed by 2 or 3 layers of stainless steel wire mesh with steel frame. Since mesh count and screen ratings can significantly impact shaker performance, choosing the correct mesh is

Idea for	Screen Size	Features & Benefits
 Sand control equipment Coal Mining 	 20 mesh 80 mesh 100 mesh 200 mesh 325 mesh 	 Accurate in mesh size,high flow rate. Wide range of mesh count for selection Increase the shaker screen's durability. Excellent chemical resistance and temperature properties

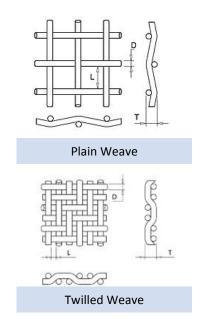

Technical Parameters

When odering, please specify:

1. Weave Type

Plain weave, twilled weave

- 2. Wire Diameter (D)
- 3. Hole Size (L)
- 4. Roll Width (RW)
- 5. Roll Length (RL)

Wire Mesh

Mesh	Wire		Aperture		Open Area	Weight
	mm	inch	mm	inch	%	Kgs/m²
